I would like to respectfully urge the FCC to REJECT NBA PRITITION 04-160. I recently came upon a motor vehicle accident involving 5 cars. The driver who caused the accident was trying to find a radio station that had music on and all he was able to find was commercials. He became very distracted, changed lanes without looking and hit another car which caused a chain reaction. This accident may have been an extream situation, but I wonder. If it happened once, it could happen again. This country is a country of freedom. Freedom of choice. You are accepting comments until June 4th. Two days before the 60th anniversary of D-Day. The day where thousands of men gave their lives for that very FREEDOM OF CHOICE. I hope today's goverment doesn't make a mockery of their death.
